

Distilling

Your partner in the distilling process!

Distilling spirits is an art that extends back to the year 1 AD. It's an ancient craft enhanced by today's technology. Avantis provides top quality ingredients and services to the distillation industry including key nutrients to promote fermentation, enzymes to promote faster fermentation and increase yield, and antifoams to control foam-up in the still. As an added benefit, our products are supported by our services. When you use our ingredients, you also get our technical expertise. In partnership with our suppliers, we can help you optimize quality and yield.

Avantis offers:

- Differentiated, high-value added products.
- Technical support to ensure optimal quality and yield in your process.
- A broad portfolio of ingredients and spirits.
- Custom packaging.

Avantis: the key ingredient to your success.

From our state-of-the-art facility in the heartland, we distribute product to all 50 states. Avantis is a WBENC certified woman owned business. Our facility is FDA/GMP compliant, kosher, USDA organic and ISO 9001:2015 certified. Avantis will achieve GFSI certification through the FSSC 22000 scheme in Q4, 2022. We ensure optimal use of our ingredients by supporting our customers with technical expertise.
